Benjamin Reiner
Front-End Developer

Summary

Web developer with a focus on front-end. Skilled in HTML5, CSS3, JavaScript, React, and WordPress, with experience designing, building, and supporting websites for small businesses. Adept at collaborating with stakeholders to deliver solutions that meet their specific needs.

Experience

Freelance Web Developer   **2020 - Current**
Mass Communications Concepts, LLC
- Designed, developed and launched WordPress and NextJS websites for local religious organizations, nonprofits, and small businesses, driving increased online visibility.
- Created interactive components using HTML, CSS, JavaScript, and plugins using PHP to enhance functionality on WordPress sites.
- Provided expert recommendations and edited web content to improve website SEO, driving higher search traffic and optimizing page performance.

Technology Consultant   **2019 - 2021**
First Parish of Sudbury
- Designed and developed user-friendly WordPress websites to enhance the online experience for church visitors and members.
- Managed and curated content for a weekly newsletter, resulting in an engaging and informative publication for the church community.
- Collaborated with key stakeholders to deliver captivating online worship experiences, attracting an average of 50 parishioners per service through Zoom and YouTube.
- Provided technical support for virtual church events, ensuring seamless access to online platforms and fostering a strong sense of community among congregation members.

Education

Bachelor of Science in Mathematics, Northeastern University
Graduated January 2016, cum laude
- GPA: 3.54/4.0
- Conducted independent research that applied mathematical concepts from linear algebra, combinatorics, and field theory to identify and count possible square roots of 2x2 matrices with entries in a given finite field.
- Awarded Dean's List in Spring and Fall 2015 for maintaining a GPA above 3.5 under a full course load.
